Dear Hiring Manager,

Thank you for the opportunity to apply for the Developer role at your company. After reviewing your job description, it's clear that you're looking for a candidate that is extremely familiar with the responsibilities associated with the role, and can perform them confidently. Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

I am an adaptable recent college graduate (70.0% GPA, BS (CS)) from COMSATS Institute of Information Technology. During the course of my academic career, where I learned valuable professional skills such as database development, web design, and web platform development. My academic, I have been consistently praised as adaptable by my professors and peers. Whether working on academic, extracurricular, or professional projects, I apply proven problem-solving and analytical skills, which I hope to leverage into the Developer role at your company.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me at +923457437366 or via email at raufmasoom366@gmail.com to arrange for a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Abdul Rauf

- ✓ Online W3CAR Website.
- ✓ Report generation in visual studio through Dev Express.
- ✓ Final Year project reporting grading A+

Final Year Project

- Faculty Management System for COMSATS Institute of Information Technology.

Abstract for Final Year Project:

- We have seen over the years that the process of manual attendance has been carried out across almost all educational institutions. The process is not only time-consuming but also sometimes inefficient resulting in the false marking of attendance. Today, we need not maintain pen and paper based attendance registers. Following this thought, we have proposed an attendance monitoring system based on the concept of web services which is implemented on the specific(local) web server. The aim of developing the online attendance management system project is to replace the traditional way of taking attendance with a computerized system. Leave approval module is present in the system.
